ANALYTIC SUBJECT INDEX

Antiferromagnet, site diluted
– Site-diluted antiferromagnet in a uniform field - Oliveira et al. **152** (1988) 477

Blume–Emery–Griffiths model
– The application of the differential operator method to the— - Kaneyoshi and Sarmento **152** (1988) 343
Bogoliubov transformation (see *Thermo field dynamics*) **152** (1988) 29
Boltzmann–Lorentz model
– The—for particles with spin. III. The Grad method of moments - Dudyński **152** (1988) 254
Bose condensation
– —in disordered systems. II. Surface and bound states - Englisch and Schröder **152** (1988) 287
Bound states (see *Disordered systems*) **152** (1988) 287
Brownian particle (see *Kramers' problem*) **152** (1988) 145
Bubbly flow (see *Two-phase bubbly flow*) **152** (1988) 1

Catastrophe theory (see *Lattice-gas model*) **152** (1988) 226
Catastrophe theory (see *Liquid mixtures, binary*) **152** (1988) 384
Cesium plasma
– Transport cross sections for charged particle scattering in (dense-)—; electrical conductivity - Sigeneger et al. **152** (1988) 365
Chaos, quantum
– Quantum chaos and peculiarities of diffusion in Wigner representation - Berman et al. **152** (1988) 273
Charge carriers in solids
– Kane model, dynamical algebra and coherent states - Rustamov **152** (1988) 451
Chemical unimolar reactions (see *Kramers' problem*) **152** (1988) 145
Classical dynamical systems
– Hilbert space description of—II - Kowalski **152** (1988) 98
Cluster-variation method (see *Ising models*) **152** (1988) 431
Coherent excitonic states
– Coherent excitonic solitons - Tošić et al. **152** (1988) 217
Coherent states (see *Classical dynamical systems*) **152** (1988) 98
Coherent states (see *Kane model*) **152** (1988) 451
Collective phenomena
– Collective population trapping and collective jumps in a system of three-level atoms - Shumovsky et al. **152** (1988) 177
Correlation function (see *Ising models*) **152** (1988) 431
Critical double point
– Study of the critical line and its double point in the intermediate model - Meijer **152** (1988) 359

Density operator (see *Quantum systems, open*) **152** (1988) 469

DeWitt detector
– Transient phenomena in the Unruh effect - Bäuerle and Koning **152** (1988) 189
Differential operator method (see *Blume–Emery–Griffiths model*) **152** (1988) 343
Dilute magnetism
– Cluster approach to— - Holvorcem and Osório **152** (1988) 431
Disordered systems
– Bose condensation in—. II. Surface and bound states - Englisch and Schröder **152** (1988) 287
Drift mass (see *Two-phase bubbly flow*) **152** (1988) 1

Electrolyte, weak
– Solution of Onsager's equation in closed form - McIlroy **152** (1988) 459
Escape rate (see *Kramers' problem*) **152** (1988) 145
Evolution equation (see *Quantum systems, open*) **152** (1988) 469
Excitation energy transfer (see *Molecular systems*) **152** (1988) 127
Excitons (see *Coherent excitonic states*) **152** (1988) 217

Grad moments method (see *Boltzmann–Lorentz model*) **152** (1988) 254
Grassmann path-integral solution (see *Ising models, two-dimensional*) **152** (1988) 51
Green functions (see *Kane model*) **152** (1988) 451
Green's function, nonequilibrium (see *Molecular systems*) **152** (1988) 127

Heat conducting gas
– The role of the internal energy in the distribution function of a— - van den Oord et al. **152** (1988) 199
Hilbert space description (see *Classical dynamical systems*) **152** (1988) 98

Internal energy (see *Heat conducting gas*) **152** (1988) 199
Irreversible thermodynamics
– Response to Z. Banach's comments on the modified moment method and— - Eu **152** (1988) 420
Ising antifferromagnet (see *Antiferromagnet, site diluted*) **152** (1988) 477
Ising models
– Cluster approach to dilute magnetism - Holvorcem and Osório **152** (1988) 431
Ising models, two-dimensional
– Grassmann path-integral solution for a class of triangular type decorated Ising models - Plechko **152** (1988) 51
I_2 gas (see *Heat conducting gas*) **152** (1988) 199

Kane model
–—, dynamical algebra and coherent states - Rustamov **152** (1988) 451
Kinetic variational theory II
– Equilibrium distribution of the—(KVT II) - Castillo et al. **152** (1988) 304
Kosterlitz–Thouless phases (see *Spin models, seld-dual*) **152** (1988) 109
Kramers' problem
– Solution of— - Janssen **152** (1988) 145

Lattice-gas model
– Probability distribution for a lattice gas model. I. General study - Güémez et al. **152** (1988) 226
– Probability distribution for a lattice gas model. II. Thermodynamic limit - Güémez et al. **152** (1988) 243
Linear response (see *Thermo field dynamics*) **152** (1988) 29
Linear transport theory (see *Noise-induced transitions*) **152** (1988) 328

Liquid mixtures, binary
– A probabilistic analysis of the Walker–Vause model for liquid binary mixtures - Güémez et al. **152** (1988) 384
Liquid–vapor transition (see *Lattice-gas model*) **152** (1988) 226
Liquid–vapor transition (see *Lattice-gas model*) **152** (1988) 243

Modified moment method
– Response to Z. Banach's comments on the—and irreversible thermodynamics - Eu **152** (1988) 420
Molecular chains, one-dimensional (see *Coherent excitonic states*) **152** (1988) 217
Molecular systems
– Excitation energy transfer dynamics in nonperiodic—. Nonequilibrium Green's function description - May **152** (1988) 127
Molecules, asymmetric
– Theory of nulcear magnetic spin–rotational relaxation for asymmetric molecules - McConnell **152** (1988) 309

Noise-induced transitions
– —: an example from linear transport theory - Menon et al. **152** (1988) 328
Nonperiodic systems (see *Molecular systems*) **152** (1988) 127
Nuclear magnetic relaxation
– Theory of nulcear magnetic spin–rotational relaxation for asymmetric molecules - McConnell **152** (1988) 309

Onsager's equation
– Solution of—in closed form - McIlroy **152** (1988) 459

Phase diagram (see *Antiferromagnet, site diluted*) **152** (1988) 477
Phase diagrams (see *Blume–Emery–Griffiths model*) **152** (1988) 343
Plasma, cesium
– Transport cross sections for charged particle scattering in (dense-) cesium plasma; electrical conductivity - Sigeneger et al. **152** (1988) 365
Population trapping (see *Collective phenomena*) **152** (1988) 177
Probability distribution (see *Lattice-gas model*) **152** (1988) 226
Probability distribution (see *Liquid mixtures, binary*) **152** (1988) 384
Probality distribution (see *Lattice-gas model*) **152** (1988) 243

Quantum rotator
– Quantum chaos and peculiarities of diffusion in Wigner representation - Berman et al. **152** (1988) 273
Quantum systems, open
– Algebraic structure of linear and non-linear models of open quantum systems - Jannussis and Mignani **152** (1988) 469

Renormalization group (see *Antiferromagnet, site diluted*) **152** (1988) 477

Scattering, charged particle (see *Cesium plasma*) **152** (1988) 365
Solitons (see *Coherent excitonic states*) **152** (1988) 217
Spin models, seld-dual
– The star–triangle transformation for self-dual spin models - Moraal **152** (1988) 109

Spin particles
– The Boltzmann–Lorentz model for particles with spin. III. The Grad method of moments - Dudyński **152** (1988) 254
Spin–rotational interaction (see *Nuclear magnetic relaxation*) **152** (1988) 309
Star–triangle transformation
– The—for self-dual spin models - Moraal **152** (1988) 109
Superfluid hydrodynamics
– Drift mass, multifluid modelling of two-phase bubbly flow and— - Geurst **152** (1988) 1
Surface states (see *Disordered systems*) **152** (1988) 287

Thermo field dynamics
– Linear response in non-equilibrium— - Nakamura et al. **152** (1988) 29
Thermodynamic limit (see *Lattice-gas model*) **152** (1988) 243
Three-fluid model (see *Two-phase bubbly flow*) **152** (1988) 1
Three-level atoms
– Collective population trapping and collective jumps in a system of— - Shumovsky et al. **152** (1988) 177
Transient phenomena (see *Unruh effect*) **152** (1988) 189
Transmission coefficient (see *Noise-induced transitions*) **152** (1988) 328
Transport cross sections (see *Cesium plasma*) **152** (1988) 365
Triangular-type Ising lattice
– Grassmann path-integral solution for a class of triangular type decorated Ising models - Plechko **152** (1988) 51
Two-phase bubbly flow
– Drift mass, multifluid modelling of—and superfluid hydrodynamics - Geurst **152** (1988) 1
Two-state Markov medium (see *Noise-induced transitions*) **152** (1988) 328

Unruh effect
– Transient phenomena in the— - Bäuerle and Koning **152** (1988) 189

Vortex system, two-dimensional
– Dynamics and spectral properties of a quantum 2D bounded vortex system - Penna **152** (1988) 400
Vortex–boundary interaction (see *Vortex system, two-dimensional*) **152** (1988) 400

Walker–Vause model (see *Liquid mixtures, binary*) **152** (1988) 384
Wien dissociation (see *Onsager's equation*) **152** (1988) 459
Wigner representation
– Quantum chaos and peculiarities of diffusion in— - Berman et al. **152** (1988) 273
